WHAT IS THIS PRODUCT?

Type: This is an Irish Collective Asset-Management Vehicle ("ICAV") type of product that is regulated as a UCITS fund by Central Bank of Ireland with passporting rights and regulation coverage in the European Union.

Objective: The investment objective of the Fund is to generate capital appreciation over the long term.

The Fund aims to achieve this investment objective by investing primarily through collective investment schemes such as Exchange Traded Funds ("ETF"), UCITS or Alternative Investment funds that are eligible for investments by a UCIT, and up to 100% of the Net Asset Value of the Fund in a diversified portfolio consisting primarily of global equities and equity-related securities.

The Fund may also gain exposure to property and infrastructure related securities through collective investment schemes including, open-ended ETF's, equity or debt securities listed, or traded on Recognised Exchanges, such as REITs, or the equity, or debt of companies involved in the property and infrastructure sector. The ability to trade REITs in the secondary market may be more illiquid than other stocks.

The Fund will aim to have a maximum allocation of 60% of Net Asset Value to any one of the following distinct three regions: Europe, the Middle East and Africa (EMEA), the Americas, Asia Pacific.

The Fund will not utilise financial derivative instruments.

The Fund is actively managed (i.e., the Investment Manager has discretion over the composition of the Fund's portfolio) in reference to a benchmark of Consumer Price Index ("US CPI") plus 4% per annum and will measure its performance against this benchmark. As the benchmark itself does not comprise of securities, there can be no overlap between the Benchmark and the securities into which it invests.

The Accumulating classes will not pay a cash dividend, any income arising from the Fund will be reinvested to grow the value of your investment. The Distributing class will pay a cash dividend.

Intended Investor: The Fund is suitable for investors that seek to capture capital appreciation over the long term and whom have a high risk profile.

You may buy and sell shares in the Fund on any day on which banks in Ireland are open for business.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicators

The risk indicator assumes you keep the product for a minimum of 5 years. The actual risk can vary if you sell at a stage earlier than the recommended holding period. If liquidated early, you may have to sell the Fund at a price that is less than you paid for the Fund.

The Fund does not offer any capital protection against market risk, or capital guarantee against credit risk.

The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data.

Historical data may not be a reliable indication of the future risk profile of the Fund.

The risk indicator for the Fund is set at 6 as this reflects the market and credit risk arising from proposed investments.

Market risk is the risk of loss due to adverse movements or changes in the industry or the economy. **Credit Risk** represents the risk that a borrower of fixed income instrument will not honour its obligations which may result in losses for the investor.

The Fund may be affected by **Liquidity Risk** if underlying funds suspend or defer payment of redemption proceeds, the funds' ability to meet redemption requests may be affected.

Please refer to the "Risk Factors" sections of the Prospectus and the Supplement for further information

PAST PERFORMANCE AND PERFORMANCE SCENARIOS

*The chart is an illustration of the USD Accumulating Share class vs. the benchmark of CPI +4%.

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It's expressed as a percentage change of the Fund's net asset value at each year-end.

The Fund launched in 2021 and shares in this class were issued in 2021.

Performance is net of any ongoing charges. Entry/exit charges are excluded from the calculation.

Past performance is based on the net asset value (NAV) of the Fund and is not a reliable indicator of future results.

HOW LONG SHOULD I HOLD IT, AND CAN I TAKE THE MONEY OUT EARLY?

Recommended Holding period ("RHP"): 5 years

Given the risk/return profile and composition of securities used, the RHP to achieve optimal returns is 5 years. This Fund is considered materially liquid and does not have a set maturity date. You may disinvest from the Fund prior to the RHP, however, given the market risk of the Fund this may result in a permanent loss of capital.
