

Omba Core Global Income

Managed Portfolio Service (MPS)

Omba Core Global Income MPS Factsheet – May 2025

FOR PROFESSIONAL ADVISERS ONLY

PORTFOLIO OBJECTIVE AND OVERVIEW

The OMBA Core Global Income Portfolio is intended for investors with at least a low attitude to risk and time horizon of at least 2 years. The portfolio seeks to achieve a long-term return of 1.0% above interest measured by the Sterling Overnight Index Average (SONIA).

The portfolio seeks to provide a diversified portfolio of Pound sterling denominated or hedged fixed income.

The portfolio aims to achieve this objective through investing primarily in collective investment schemes structured as Exchange Traded Funds (ETFs).

Weighted Average Yield to Maturity	5.12%
Number of Different Issuers	351
Number of Different Bonds	1,147

MANAGER COMMENTS

May was a great month for markets as global equities (MSCI ACWI, +5.8% MoM) led by the US (S&P 500, +6.3% MoM) maintained their strong post-tariff-pause momentum to recover more of their year-to-date losses as investors now choose to ignore short-term, erratic trade policy noise. Equity investors remain unphased by jitters in the bond market which pushed the benchmark 10-year US Treasury yield to 4.5% during May before settling at 4.4%. The so called “Big Beautiful Bill” could add trillions to the US Federal debt pile over the next 10 years, testing the limits of already skeptical bond investors who are now very much aware of the unsustainability of US fiscal policy. The US dollar was largely stable versus trade partner currencies in May (DXY Index, -0.1% MoM) after protracted weakness throughout 2025. European (Stoxx 600, +5.0% MoM) and UK equities (FTSE 100, +3.8% MoM) also enjoyed robust performance but fell behind US counterparties and especially US Tech stocks (Nasdaq 100, +9.1% MoM). Japanese (Nikkei 225, +5.3% MoM), Korean (KOSPI, +5.5% MoM) and Chinese equities (Hang Seng, +5.9% MoM) also posted strong gains as did Mexico (iShares MSCI Mexico Capped UCITS ETF, +5.8% MoM) which is up 30% year-to-date. Gold paused its unstoppable rise (Gold Spot, -0.7% MoM) with investors finding alternative haven in Bunds (DE10Y, +6.9bps MoM). Oil prices stabilised (Brent Crude, +1.2% MoM), limiting the year-to-date freefall.

DISCLAIMER

This document is intended for professional advisers only. Not for onward distribution.

This document has been issued by OMBA Advisory & Investments Ltd of Cargo Works 4.04, 1-2 Hatfields, London, SE1 9PG, the Investment Manager of the OMBA Managed Portfolio Service. Omba is authorised by the Financial Conduct Authority in the United Kingdom. This document has been prepared for marketing and information purposes only and is not a solicitation, or an offer to buy or sell any security. The information on which the material is based has been obtained in good faith, from sources we believe to be reliable, but we have not independently verified all third-party information and we make no representation or warranty, express or implied, as to its accuracy. All expressions of opinion are subject to change without notice. This document should not be relied upon for accounting, legal or tax advice, or investment recommendations. Reliance should not be placed on the views and information in this material when taking individual investment and/or strategic decisions.

The investments of the Managed Portfolios are subject to normal market fluctuations. The value of the investments of the Managed Portfolios and any income derived from them can fall as well as rise and investors may not get back the money they originally invested. If investing in foreign currencies, the return in the investors reference currency may increase or decrease as a result of currency fluctuations. Past performance is not a reliable indicator of future results and may not be repeated. Forecasts are not a reliable indicator of future performance.

Performance reflects the model performance including the underlying costs of the holdings of the model. It does not include any transaction costs imposed by the platform or executing venue that would have been incurred in rebalancing the model or changes to the model. The implementation of this model may differ depending on the platform provider and the ability of the platform to provide access to the underlying funds and securities including the use of Omba Funds in place of direct holdings in ETFs. The above performance has used the direct ETFs and uses a higher MPF of 0.30% compared to the 0.10% MPF charged on this model. This may lead to difference in allocations, performance and cost.

Omba Advisory & Investments Ltd does not accept any responsibility whatsoever for any consequential loss of any kind arising out of the use of this document or any part of its contents.
